

RDG AWARDED JOHNSON CREEK CONFLUENCE SALMONID HABITAT ENHANCEMENT PROJECT

(Corvallis, Oregon – April 29, 2008) – River Design Group, Inc. (RDG), a leading river restoration engineering firm with offices in Whitefish, Montana and Corvallis, Oregon has been awarded the design services contract for the Johnson Creek Confluence Salmonid Habitat Enhancement Project by the Johnson Creek Watershed Council. RDG will complete an existing conditions assessment, hydraulic modeling, alternatives analysis, and a 30% design for the project area located near Milwaukie, Oregon. Target fish species include Chinook, coho, steelhead, and cutthroat.
